

I can't beleive this one is trying to be snuk by the American public. It's nice to know that the FCC is going to give up are already incredibly diminished right to a free media by allowing even more of a monopoly to be created. Who dreamed up this plan? Hitler? I find it convienient that hardly anyone knows about this proposed change. I can't imagine why the press hasn't publicised this more. Actually, I can. They don't want anyone to know or comment on this issue!!

A true democracy requires a media with checks and balances, not one that is controlled by a handful of people. Please, do not aloow this regulation change to pass and do not turn our media into even more of a monopoly than it is.
